

ŽIVOTOPIS predavača: Bodo GOSPODNETIC, P. Eng

Bodo Gospodnetić po profesiji je inženjer elektrotehnike i poduzetnik sa širokim spektrom iskustva u proizvodnji i znanstvenim radovima. Diplomirao je elektrotehniku na Carleton University u Ottawi, Kanada. Prije nego što je osnovao Dominis Engineering, radio je na primjeni računala u području računalnih komunikacija, radar modeliranja i obrade slika. U Dominis Engineering-u pokrenuo je razvoj novih procesa i CAD/CAM aplikacija za obradu i mjerenje propelera, turbinskih lopatica i impelera za mlazne vodene motore.

Bodo Gospodnetić is a professional engineer and technical manager with wide range of experiences in manufacturing and scientific applications. He is a graduate of Carleton University in Ottawa, Canada, with a B. Eng. in electrical engineering. Prior to his founding of Dominis Engineering he worked on computer applications in the fields of computer communications, radar modelling and image processing. At Dominis Engineering he has been involved in the development of new processes and CAD/CAM applications for machining and measurement of propellers and turbine blades.
